Mt. Everest School

TO WHOM IT MAY CONCERN

This is to inform that Samjana Ghatani, B.K. 11 years, studies in class I of Mt. Everest School, Chailsa village at Solukhumbu district of Nepal. She was born with no ear canals and had difficulty in hearing normal speech.

The 'HearingNEPAL Program' donated and fitted her with a bone conducting hearing aid in 2011 and has checked as well as upgraded them on 4 subsequent visits. She is now doing better than her past years. According to her academic results of 2013-2014 of class I, she passed English, Tibetan, General Science but failed in Nepali, Mathematics and Social Studies. She will have benefited with extra tuitions to help her keep motivating for continue education and school.

She is just like other students who like to come to school and study. She is of happy nature and her self confidence and has greatly improved with her hearing ability increases.

Thank You for your Assistance.
